## Neural Therapist Discovers CAMS Therapy

We love hearing from CAMS users-- especially since we are exploring new vistas with this modality. Medicine without pills, knives and needles is becoming a real possibility as the technology spreads around the globe.

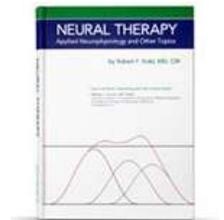

Recently, a Neural Therapist in Argentina purchased a CAMS Personal Tuner to augment his practice. He was intrigued by the possibility of eliminating needles used for routine injections of procaine. In the following account, he shares his first experiences hoping they can be valuable for others.

"The first time I used the Personal Tuner, I was fortunate to have the patient experience a 'lightning reaction'[an immediate improvement as described by the developers of Neural Therapy]. The patient had suffered for 20 years with pain that had progressively worsened and spread throughout her body. Evaluation revealed the pain had begun after a series of four surgeries that culminated in a hysterectomy. I identified the primary interference field in the gynecological area and also determined to treat the point of emotional conflict identified by Dr. Crosby in his book [located at the top of the head behind the right ear]. Prior to treatment, and out of curiosity, I soaked a ball of cotton with procaine and swabbed the area I was about to treat. Following the treatment, the patient described a metallic taste in her mouth -- evidence of the rapid and widespread distribution of procaine promoted by the CAMS unit. The patient

experienced five days of improved energy without pain before she returned for a second treatment. I am finding that I use needles much less in my work -- much to the relief of many patients. "

Neural Therapy, developed by two German physician/dentists, works by treating interference fields with local anesthetics, resulting in the restoration of normal cellular resting potential and the resolution of many symptoms.

You can read more about interference fields, Neural Therapy and their connection with CAMS technology in Dr. Crosby's book, [\*Beyond Pills, Knives & Needles\*](#) and also in the book, [\*Neural Therapy\*](#) by Robert Kidd.
