CAMS End of Year Specials

This month, Crosby Advanced Medical Systems leads the holiday gift giving with a holiday special like never before--or ever again! To celebrate the season and the recent upgrade to our website, we're offering a 30% discount on ALL CAMS UNITS.*

The new Website features a [side-by-side comparison](#) identifying the features and benefits of each unit. Compare treatment times, size, mode of operation, ease of handling, source of power, and billability. We've made it easy to select a unit based on your needs and circumstances.

All units now come with Blue Light Technology for the treatment of microbial infections often associated with pain and inflammation. Blue Light (470 nm) controls many types of bacteria including periodontal bacteria, acne, and resistant types of staphylococcus (MRSA). For further information on Blue Light Therapy, [read the article](#) on the new Website--or [purchase Dr. Crosby's book](#), *Beyond Pills, Knives and Needles*.

When naturally balanced, the human body is capable of amazing feats, including miraculous and sometimes spontaneous healing. CAMS devices incorporate the resonant frequency of the Earth which has a balancing effect on all life forms; the Earth's most abundant mineral (quartz) which has played a pivotal role in ushering in our technological age; scalar energy, the underlying force of the universe; and conscious intention. Together, these

elements relieve pain and inflammation while providing the balance that allows deeper healing--without chemical or mechanical intervention. [Visit the new Website](#) today and take advantage of this opportunity to purchase at 30% off regular retail prices.

**Happy Holidays from:
Crosby Advanced Medical Systems!**

Buy any CAMS unit and get a FREE copy of Dr. Crosby's new book!

Beyond Pills, Knives and Needles, explains the science behind the CAMS technology. It will guide you as you learn to use your new CAMS device for the rapid resolution of pain, inflammation, and emotional trauma.

Ask Dr. Crosby

Can I use the CAMS Blue Light to treat biofilms?

Yes. Biofilms are often more vulnerable to energetic methods of eradication like the electromagnetic wavelengths in the CAMS units. Recent user experience supports Blue Light Technology as a viable therapeutic modality for biofilms.
