## CAMS/RJV: Unprecedented Telomere Re-growth

"I was excited to participate in the RJV Telomere study," says Barbara Nelen, a Licensed Massage Therapist, CranioSacral Therapist, Lymph

Drainage Therapist and Coach, " but I had no idea the benefits would be so profound or so rapid. Within the first week, I noticed improved focus and clarity as well as better sleep. Over the next few months, my stamina, strength, and endurance steadily improved. I have much more energy at the end of the day."

Barbara is one of 20 participants in a study designed to determine the extent to which human telomeres can be re-grown using the resonance of normal, healthy chromosomes delivered via the CAMS technology. The study has been in progress for 18 months and many of the participants are enjoying benefits similar to those noticed by Barbara. But for Barbara, these benefits were just the beginning.

"After several months, a varicose vein behind my knee disappeared -- entirely. Later, intermittent gallbladder pains went away when I directed the unit at my gallbladder. I used to be a chronic dieter -- always hungry. Now I am eating normally; I don't pay attention to calories and yet I am slowly losing weight. The only thing I can figure is that my DNA is idling faster," says Barbara with a smile. " But the fun part

is the improvement in telomere length. Recent tests showed improvement from the 18th to the 37th percentile. That's like going from a woman in her late 60's to a woman in her mid 40s! ...and that's how I feel!"

Like other CAMS devices, the newest unit (TensCam/RJV Jr.) uses solid state quartz technology to change light and electrical input to scalar output. When directed towards the human body with intention, it re-establishes the body's normal frequency patterns and balances the bio-energetic field. However, the TensCam/RJV Jr. can also be set to apply a specific band of frequencies recently identified as the resonance of healthy chromosomes. Research suggests these frequencies may lengthen telomeres and have other anti-aging benefits.

"I have been diligent, using the TensCam/RJV Jr. twice a day for 15 minutes," says Barbara. "I turn it on, think of rejuvenation and then read, watch TV or surf the web for 15 minutes. Who would have thought getting younger could be so simple."
