DVD Available: Dr. Crosby at the Tesla Tech Convention

Since the advent of the CAMS Technology at the beginning of the 21st century, I have given lectures and workshops all over the world to explain and demonstrate its usefulness. While a lecture or workshop is an excellent way to get an "up close and personal" experience with a new modality, it is not always feasible for a practitioner to take time off to attend a workshop. In an effort to provide continuing education, I am offering a DVD of a recent lecture given at the Tesla Tech Conference held this summer in Albuquerque, New Mexico. I was invited to review the science and efficacy of CAMS technology for the non-invasive resolution of pain, inflammation and other symptoms of imbalance in the human bio-energetic field and to report on the latest developments in CAMS Therapy.

Highlights of the approximately 75-minute lecture include an overview of the elements that make CAMS effective: The Schumann Resonance, solid state quartz crystal technology, scalar energy, and the power of human intent. The lecture reviews a number of case studies with visual documentation -- everything from arthritis, to ocular disturbances, recovery from surgery, and resolution of disease symptoms.

The lecture also reviews our recent anti-aging research with the new RJV TensCam. This exciting topic capitalizes on the identification of the resonance of normal, healthy chromosomes. These frequencies can be delivered via CAMS technology for a wide range of anti-aging benefits and the unprecedented re-growth of telomeres.

Watch the lecture in the comfort of your own home or office. Contact Dr. Crosby to purchase.

\$15.00 includes free shipping anywhere in the world. (The same DVD is being sold from the TeslaTech website for 29.95 + shipping.)

CAMS technology uses solid state quartz technology to change light and electrical input to scalar output. When directed towards the human body with intention, it re-establishes the body's normal frequency patterns and balances the bio-energy field.
